## WHAT IS A FARMERS' MARKET?

- Farmersmarkets bring together the areasqgrowers of in season fruit and vegetables along with a choice of original and locally produced food and drink. In addition the market is an outlet for local arts and crafts stalls.
- Farmersqmarkets are held throughout Kent, weekly, fortnightly or monthly. Details of other markets can be found at: [www.kentfarmersmarket.org](http://www.kentfarmersmarket.org)
- They give smaller businesses the opportunity to sell direct to the public, so you get a fairer price.
- The local sourcing of produce helps reduce damage to our environment

## ABOUT THE MARKET

In 2009 Bearsted Parish Council undertook a questionnaire to form the basis of a Parish Plan for the community. The Plan identified, amongst other things a request for a FarmersqMarket to provide an outlet for local producers and a way of purchasing fresh, quality produce direct from the producer.

The Market is therefore run by the Parish Council who have appointed a Market Manager to oversee the administration and operation of the market.

The number and mix of stallholders may vary throughout the year, according to growing seasons but we will endeavour to provide a wide variety of produce at all times.
